How to Enable Google Now Cards

Want to start using Cards? Great! Here's what you have to do.

- 1 Launch the **Google app**.
- 2 Enable the **Google Now** feature.
- 3 Tap the menu button at the top left.
- 4 Select **Settings**.
- 5 Select **Your feed**.
- 6 Tap the option called **Turn on the feed**.
- 7 Grant Google the necessary permissions.
- 8 When prompted, tap **Set Up**.
- 9 If prompted, select the Google account you want to use.
- 10 When prompted, tap **Yes, I'm In**.
- 11 Customize your Card preferences.
- 12 Go back into **Settings > Your feed**.
- 13 Scroll down to the **Get notified about** section.
- 14 Enable/disable the cards according to your needs.

If you ever want to stop using Cards, go back into Settings and disable the feed. It's as simple as that.

Thank You
