

# MAKE A CONFETTI CANNON

Celebrate festive events like graduations and birthdays with a homemade confetti cannon.

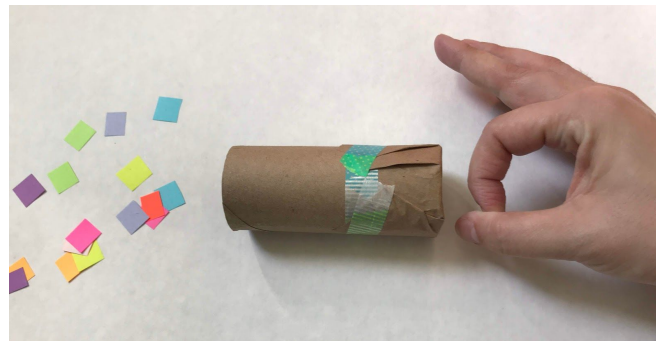

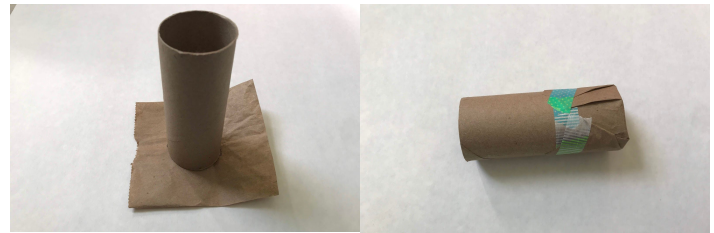

## Supplies

- Cardboard toilet paper tube
- Brown paper bag (or plastic cling wrap)
- Scissors
- Tape
- Small pieces of paper for confetti (biodegradable is best!)

## Instructions

- Cut a square from the brown paper bag. The square should be at least 3 inches by 3 inches.
- Tape the paper square to the tube so it is taut across one of the open ends.
- Place the paper confetti pieces in the tube.
- To fire your confetti cannon, direct the open end of the tube where you want to shoot the confetti. Flick your finger against the taut paper to propel the confetti from the tube.

*You could also create a confetti cannon using other materials.*

- Use a balloon instead of the brown paper bag. To fire your balloon confetti cannon, pull back the tied end of the balloon and release.
- You can create a push-motion confetti cannon using both the tube and the push stick from a push pop ice cream treat. Clean the tube and push stick, then eject confetti from the tube by pushing the stick through the tube.
